

GRIBINOX 320LR

IDENTIFICATION

GRIBINOX 320LR E320LR-15

CLASSIFICATION

AWS/SFA 5.4: E320LR-15; BS: 2926: 20.34.2.CuNb.B

DESCRIPTION

Basic coated stainless steel electrode depositing fully austenitic, niobium stabilised weld metal with molybdenum and copper which has a high resistance to corrosion in sulphuric acid, other mineral acids, organic acids and their mixtures. Most parent material specifications are for castings. Deposited weld metal which is fully austenitic, has controlled level of phosphorus and silicon which helps

to eliminate solidification cracking tendency.
