
GRICON GOUGE

AN EXTRUDED HEAVY COATED ELECTRODE FOR GOUGING AND CHAMFERING.

IDENTIFICATION

Gricon Gouge

DESCRIPTION

The electrode has an exothermic coating which ensures a stable but hot and penetrating arc. The electrode can be used in all positions with negligible slag.

TYPICAL APPLICATIONS

- The electrode is used for gouging and making grooves in steel, cast iron, aluminium and copper.
- Very useful for removing defective previous weld runs of chipping or for removing rivet heads of old or defective riveting.
- Also used for removing flashes and risers on foundry castings.
